Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from A Text-Book of Psychology for Secondary Schools, Vol. 1 Several years ago the present writer prepared a small work upon elementary psychology, which was published just before the large number of elementary books on the subject made their appearance, and before the new psychology, so-called, had taken on any very definite form. That work had a special purpose in view, made no claim to originality in matter, and naturally followed, in its arrangement of material, the usual order of the so-called old psychology. Since that time many changes have occurred in the department of mental science. New theories have been advanced, new modes of expression have been adopted, and new arrangements of matter have come into favor in many quarters. The progress of discussion and further study and investigation have modified, to some extent and in some directions, the opinions of the author. The present work is the result of these modifications and changes. The fact is recognized that theories are still in an unsettled condition, and that other and further advances will be made, and consequently other modifications and changes will become necessary in the future.
