Reviews

It is really an remarkable book which i have ever go through. It can be writter in simple terms and not difficult to understand. I am just effortlessly can get a enjoyment of reading a composed pdf.
(Dr. Lily Wunsch II)

VIRTUAL CLINICAL EXCURSIONS FOR MEDICAL-SURGICAL NURSING, 7E

Mosby, 2007. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: Virtual Clinical Excursions is an innovative CD-ROM/workbook package that makes textbook content come alive and diminishes your anxiety about entering the clinical setting. VCE helps bridge the gap between the classroom and the real world by introducing you to clinical settings and critical thinking before you actually start clinical rotations - making the transition from nursing student to caregiver a smoother process. In this virtual hospital setting, you will interact with a variety of patients and gain valuable experience with documentation, communication, prioritization, medication safety, critical thinking, patient education, and care planning. Real-world nursing scenarios challenge you to set priorities for care, collect data, analyze and interpret data, and reach conclusions about complex problems within a health-illness transition. The highly engaging format encourages active learning and provides opportunities to collect and process data for evidence-based patient care; work with data entry and retrieval screens; access available information resources; understand hospital information systems; manage information for decision-making; and maintain and improve your core computing skills. Includes over 250 NCLEX examination-style questions based on the VCE patients. Augments knowledge of physical assessment by allowing you to examine and document vital signs, as well as assess information related to the head and neck, chest, back and spine, upper extremities, abdomen, pelvic, and lower extremities. The software allows you to access realistic information essential for patient care, including: charts, medical administration records, electronic patient records, video clips of nurse-client interactions, and other related materials. The realistic environment gives you the opportunity to monitor and care for one or more patients during three 45-minute periods of care within a 12-hour shift. Clinical Alerts highlight changes in the patient's condition. New flash-based technology is easier to use and offers seamless...
