

# Treatise on differential equations

By George Boole

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 62 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1865 edition. Excerpt: . . . of which I propose to consider in this paper, is remarkable from its connexion with Geometry. If the equation of a surface contain three constants which vary as parameters in subjection to any two conditions connecting them, the generated envelope will satisfy a partial differential equation of the above form. In other words any envelope of the surface  $F(x, y, z, a, b, c) = 0$  formed by the variation of  $a, b, c$  in subjection to two connecting conditions and  $(, h c) = 0, \partial^2 (a, b, c) = 0$  is necessarily an integral of a partial differential equation of the form given above. Now this theorem is the more important, because it is only when three parameters in the equation of a surface vary in subjection to two relations that the envelope possesses, irrespectively of the form of the connecting relations, any definite character....

## Reviews

*Good eBook and helpful one. It really is written in straightforward words and phrases and never confusing. I am just effortlessly could possibly get a enjoyment of looking at a published book.*

-- **Romaine Rippin**

*The book is great and fantastic. it absolutely was written very properly and beneficial. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- **Lyda Davis II**
