

## Elements of Solid Geometry (Paperback)

Filesize: 3.67 MB

### Reviews

*These types of pdf is the greatest pdf readily available. I actually have study and that i am certain that i am going to going to go through again again later on. You wont sense monotony at at any moment of your own time (that's what catalogs are for relating to when you request me).*

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 Excerpt: . etc., so inclined that the distances between their vertices KG, GH, HI, etc., shall equal AB, i. e., so that the inserted triangles AGK, BGH, etc., shall be equilateral triangles. This gives figure b, with the open base GHIJK. Since the = legged isosceles As AFC and ABC are upon the same base AC they are =, and  $Z AFC = Z ABC = 108.$ -. the pyramid B--AFCHG, having = lateral edges, and standing upon an equilateral base, one of whose angles is 108, must be a regular pyramid = pyramid F--ABCDE.-. the polyhedral Z 5 = the polyhedral Z F. Similarly all the other completed polyhedral Zs A, C, etc., can be shown to be =. Upon the edges GH, HI of the open base, erect the equilateral As GHL, HIL, giving us figure c. The pentagon BCILG is regular, since it is equilateral, with two Zs = 108 each. The = legged isosceles As GHI and GLI upon the same base are =, and  $Z GHI = Z GLI = 108.$  So with the Z between the other edges of the open base.-. the open base GHIJK is a regular pentagon, and can be taken as the base of a regular pyramid == pyramid F--ABCDE, giving figure d. The polyhedral Z\$ G, H, etc., can be proved = as were the Zs A, B, etc. Therefore, the figure, being formed from equilateral As, and having its polyhedral /j, =, is a regular polyhedron. 209....
