Reviews

This pdf might be well worth a study, and a lot better than other. It really is simplistic but excitement inside the fifty percent in the book. Its been printed in an exceedingly straightforward way which is just after i finished reading this ebook through which really modified me, modify the way i believe.

In response to a congressional request, GAO analyzed the Social Security Administrations (SSA) budget request for its information technology systems modernization for fiscal year (FY) 1988. GAO found that SSA: (1) budgeted about 283 million for its proposed systems modernization plan, including software development, database integration, and management information; (2) estimated that it would require about 8.2 million for additional telephone acquisitions, including 2 million for contracts associated with automatic data processing maintenance; and (3) revised its budget for FY 1988, drastically reducing its need for hardware procurement, and cancelling a distributed data processing task force project. GAO also found that: (1) SSA would have a 181 million carry-over balance at the start of FY 1988, more than the 116 million that SSA projected; (2) since SSA decided to use in-house resources for its software improvement, it would not need an estimated 500, 000 in FY 1988; and (3) although SSA revised its budget request in many areas, it planned to increase its 1988 request in areas dealing with telephone acquisitions and maintenance. This item ships from La Vergne, TN. Paperback.
