

Computational Methods for Electromagnetic and Optical Systems

By John M. Jarem

Taylor & Francis Inc, 2011. Hardcover. Book Condition: New. 2nd Revised edition. 17.8 x 25.4 cm. "This text introduces and examines a variety of spectral computational techniques - including k-space theory, Floquet theory and beam propagation - that are used to analyze electromagnetic and optical problems. The book also presents a solution to Maxwell's equations from a set of first order coupled partial differential equations"--Provided by publisher.
