

Age-associated Neurological Diseases

Filesize: 2.33 MB

Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

(Mitchell Kuhn III)

AGE-ASSOCIATED NEUROLOGICAL DISEASES

Book Condition: New. Publisher/Verlag: Springer, Wien | This volume covers selected up-dated contributions from the Conference on Age-associated Neurological Diseases held in Vienna 1989. Fields covered include Age-associated Memory Impairment (AAMI) Alzheimer's and Parkinson's diseases and dementias and movement disorders of other etiologies. Concerning dementia, some papers deal with diagnosis employing neuro-imaging methods - PET, SPECT, MRI and XCT, others by means of electro-physiological methods. An important aspect is the early preclinical diagnosis of dementia using neuro-psychological tests to enhance the chance of effective treatment. Finally, drugs now under clinical investigation are discussed and preliminary results for several compounds are presented. This volume with its up-to-date contributions will be of special interest to all physicians treating elderly persons with age-associated degenerative diseases. The papers compiled in this supplementum are a selection of the best contributions presented at the 19 Central-European Neurological Symposium (CNS 19) held on June 29 - July 1, 1989 in Vienna. The main topic of this conference was degenerative and age-associated neurological diseases. In recent decades life expectancy has dramatically increased, at least in the industrialized countries. This has led to extreme distortions of the so-called population pyramids that no longer look like such but begin to almost resemble cylinders. As a consequence of this "overaging" of the population, diseases that are associated with age have become much more common than before. It was thus more than reasonable to devote a congress of the CNS series to these important neurological diseases. The following fields of interest are covered: Age-associated memory impairment (AAMI), Alzheimer's and other dementias, Parkinson's disease and other movement disorders, stroke and others. Concerning the dementias, some papers deal with diagnosis employing neuro-imaging methods such as MRI, CT, PET and SPECT, others using electrophysiological methods. An important aspect in the early...
